

Sirs

I am a subscriber to XM radio and use it during frequent travels across the desert where the superior quality and lack of advertizing intrusion makes it an ideal travel companion. I make significant use of the weather and travel services offered using XM Satellite radio and I must support them against the ridiculous petition proposed by NAB to limit or prevent such broadcasts. This would have a severe and damaging effect on my enjoyment of the services offered.

I respectfully ask you to consider rejecting the NAB petition 04-160 in the interests of the general public.

Kind regards

Steve Congrave
